Summary

In the course of 20 years of study, research and experience in all relevant aspects of the business, **developed highly successful companies, ground breaking systems, products and software**. **Led high performance teams, managed mission impossible projects. Solved systems and business problems acclaimed to be unsolvable**.

Invented and pioneered the ground breaking theory, concepts and algorithms in ***Corporate Genetics***™ **and** ***Virtual Management Selection***™ which will certainly **revolutionize** our understanding **in assessing, diagnosing, evaluating and redesigning corporate strategies, structures and behaviour**. Designed and developed ***Corporate Genetics***™ ***Software*** **with applications in product development, marketing, sales, advertisement, investments and human ressources to maximize share holder value.** Developed concepts and algorithms for the *remote deployment and application* of ***Corporate Genetics***™ in the web.

Developed and deployed ground breaking **top-management consulting and top-management development methodologies, procedures, algorithms** and **software,** as well as highly innovative **top-management seminars and training**. Applied them in **logistics, tourism, ground handling, airlines, customs brokerage, foreign trade, textile, stock brokerage, insurance, banking, confectionery and computer industries**.

Substantial experience in systems and software development, project management, recruitment, head hunting, top-management training, top-management consulting, sales, marketing, advertisement and business development.
